▷ PROFILE

I am currently a student pursuing a Professional Master's in Data Science and a graduate in Business Information Systems. I am actively seeking a stable position in the field of web development and data science. With 2 years of experience as a Full Stack Web Developer and UI/UX Designer in freelance, I have turned my passion into a profession. I particularly enjoy teamwork and thrive in collaborative and dynamic environments.

▷ SKILLS

- Full Stack Web Development: JavaScript, HTML, CSS, PHP, Angular, Node.js , Odoo
- Mobile Development :Java, XML, Flutter
- Databases : MySQL, NoSQL(MongoDB)
- Programming Languages: C#, C++, Python, JEE
- UI/UX Design: Figma
- Development Methodologies : Programmation orientée objet (POO)
- Version Control: Git, GitHub
- Microsoft Office: Word, Excel, PowerPoint

▷ PROFESSIONAL EXPERIENCE

Final Year Project | February 2024 – may2024
Developer and UI/UX Designer

I created and managed an e-commerce website that offers a user-friendly experience for ordering fresh fruit and vegetable baskets online. Customers can browse a variety of products, create their virtual basket, and complete their order in a simplified process. By creating a personal account, users gain access to exclusive features and can track their orders. The site guarantees fresh, high-quality products, carefully prepared by a dedicated team and delivered

directly to the customer's door. This platform ensures exceptional customer satisfaction, combining convenience with excellence.

As a developer, I worked on backend programming using JavaScript and handled source code management. Simultaneously, as a UI/UX designer, I ensured the creation of intuitive and aesthetically pleasing user interfaces using HTML5 and CSS. The design process was carried out on Figma, ensuring a collaborative approach and a clear vision of the final site layout.

Centre pole light | Februray 2024 – may 2024

Intern

- As an intern at Centre Pole Light, I was responsible for the design and implementation of websites.
- The technologies used included JavaScript, HTML5, CSS, MySQL, Angular, Git, and GitHub..
